

Fossgate, Stonebow and Pavement road improvements

City of York Council is investing £1.1million to make major improvements to Stonebow, Fossgate and Pavement in York's city centre. The works will improve the street's appearance and character, create a more pedestrian-friendly environment and improve access for pedestrians and cyclists, which will attract more visitors to the area.

During the works there will be some disruptions to traffic and buses trying to access the area. Residents and visitors are urged to plan ahead, allow more time for journeys on these routes and to consider alternatives or to use other public transport where possible.

The taxi rank on St Saviourgate will continue to remain in place during the works and road closures. Access along St Saviourgate will remain.

We apologise for any disruption caused.

Changes to Park and Ride

During the road works the Grimston Bar and Monks Cross Park & Ride services will be diverted and other bus stops in the city centre will be used. Delays are expected, particularly on the Monks Cross service. You may wish to consider using an alternative Park & Ride site during the works. We do not expect significant delays to the other four Park & Ride services at Askham Bar, the Designer Outlet, Poppleton Bar and Rawcliffe Bar.

Changes to bus services

If your normal route travels along Stonebow then your bus will be diverted and your usual bus stop may not be used. Buses affected include services 6, 11, 12, 13, 14, 21, 25, 181, 840 and 843.
